

**CHURCH IN THE FOREST  
FUND FOR THE FUTURE  
GIFT ACCEPTANCE AND INVESTMENT  
POLICIES**

**HISTORY, PURPOSE, GOALS, AND OVERVIEW  
OF THE FUND FOR THE FUTURE**

**1. HISTORY**

The Church in the Forest (hereinafter referred to as "CitF") has established a fund named "The Fund For the Future" (hereafter referred to as "FFF"). Since February 2000, members and friends of CitF have made numerous and generous gifts and bequests to the FFF to further the mission and outreach of the Church. The first major accomplishment of the FFF was to retire the mortgage on a manse purchased by CitF. This was accomplished in 2008. Another major achievement was helping to fund the construction of the enlarged church patio in 2010 in cooperation with Stevenson School.

**2. PURPOSE**

The purpose of the FFF and these Gift Policies is to allow CitF members and friends opportunities to give gifts that support CitF's present and future mission in accordance with the giver's intent. The FFF was established with the objectives to provide financial stability for the Church, to provide financial resources to sustain and enhance the quality of services of the Church, and to provide for extension of the Church's outreach. The many persons who have responded, and will respond to this opportunity realize that a gift to the FFF represents a legacy for the future, a statement of faith in CitF's ministry, and a means to share the many blessings that God has provided.

**3. INVESTMENT GOALS**

The FFF's investment goals are threefold: (1) to endeavor to protect the principal value against inflation, (2) to seek growth of the funds donated to the FFF, and (3) to ensure that monies donated are spent in accordance with the designated purposes of the various established funds and in accordance with any restrictions which accompanied the donations.

**4. OVERVIEW**

To encourage CitF's long-standing tradition of generosity, the Trustees of the FFF have developed, and the CitF Board of Directors has approved the following documents to govern the acceptance of gifts into the FFF and to ensure their responsible management.

- Annex A: Gift Acceptance Policy
- Annex B: Designated Funds

## ANNEX C.

### INVESTMENT POLICY

This policy statement provides a framework for the management of the investable assets of the FFF of the CitF. This policy will assist the FFF Trustees in supervising and monitoring the investments in the Endowment/Long-Term Portfolio and the Short-Term Portfolio. An Investment Committee, appointed by the FFF Trustees, is charged with the management of the Portfolios in accordance with this policy statement. These guidelines allow for flexibility and a process to capture investment opportunities, while prudently and carefully setting forth reasonable risk control parameters for the investment program.

The statement of investment policy is intended to address asset deployment, liquidity and diversification requirements, which should not be violated over the planning horizon. Policy issues relate directly to the return requirements and risk parameters of the Portfolios and are to be considered the general principles governing the investment management of the Portfolios. The management of the Portfolios will follow basic fiduciary responsibilities. The investments of the Endowment/Long-Term Portfolio will be diversified to help reduce the overall risk of the Portfolio, unless under the circumstances, it is clearly prudent not to do so.

This policy addresses the following issues:

- 1) The goals and objectives of the Portfolios and the investment program.
- 2) The investment strategy including asset allocation, spending policy, rebalancing procedures and investment guidelines.

#### 1. ENDOWMENTS AND OTHER LONG-TERM INVESTMENTS

Endowments and Temporary Restricted funds whose investment horizon is five years or more are managed in the Endowment/Long-Term Portfolio.

- A. INVESTMENT OBJECTIVES:** The primary investment objectives of the Endowment/Long-Term Portfolio are to preserve the real purchasing power of the principal and to provide a stable source of perpetual or long-term financial support.
- B. PERFORMANCE GOALS:** On an annualized, net-of-fees basis, the total return of the Portfolio will be expected to equal or exceed the spending rate plus inflation (San Francisco CPI) over a rolling five-year period. Additionally, the returns should show favorable, relative performance characteristics. These returns should equal or exceed the average return of appropriate capital market indices weighted by the asset allocation target percentages over a rolling five-year period; and equal or exceed the average return of a universe of

similarly managed funds. Performance goals are based upon a long-term investment horizon, and interim variations should be expected.

- C. INVESTMENT PHILOSOPHY:** Asset allocation is the major determinant of investment performance over the long term. Consequently, a long-term asset allocation plan, consistent with the Portfolio’s objectives and performance goals is followed. Assets are managed on a total return basis. Although the policy recognizes the importance of preserving capital, it must also reflect that increased degrees of investment risk are generally rewarded with increased returns that compensate for the additional risk. Additionally, risk greater than that of stable long-term low-risk securities is required to preserve the purchasing power of the Portfolio. It is appropriate to pursue riskier investment strategies if such strategies are in the beneficiaries’ best interest. Selection of investment strategies is evaluated on a risk-adjusted basis as needed to meet the investment objectives of the Portfolio. Risk management of the investment program is focused on understanding the Portfolio’s investment and operational risks. The investment program seeks to reduce operational risks and achieve appropriate compensation for the investment risks the Portfolio undertakes.
- D. INVESTMENT PROGRAM POLICY:** The Endowment/Long-Term program invests according to an asset allocation plan that is designed to meet the goals of the Portfolio. The plan is based on a number of factors including the projected spending needs, the maintenance of sufficient liquidity to meet payout requirements and the return objectives and risk tolerances of the Portfolio. The asset allocation plan provides for diversification of assets in an effort to enhance the investment return while reducing the risk of the Portfolio consistent with market conditions. Because of fluctuation of market values, allocations within a specified range constitute compliance with this Policy. An extended period of time may be required to fully implement the asset location plan, and periodic revisions will be required. In addition the investment policy will be reviewed annually by the FFF Trustees.
- E. ASSET ALLOCATIONS:** The Endowment/Long-Term Portfolio is allocated across a number of investment classes to provide diversification and achieve the Portfolio’s investment objectives. The following table defines the Portfolio’s target asset allocation and range for each asset class:

Endowment/Long-Term Portfolio  
Target Asset Allocation

<b>Asset Class</b>	<b>Target Weight</b>	<b>Variation</b>	<b>Representative Index</b>
Domestic Equities	45%	+/- 10%	S&P 500
International Equities	15%	+/- 5%	MSCI World Ex-US Index
Fixed Income	25%	+/- 10%	Lehman Aggregate
Alternative Investments	10%	+/- 5%	
Cash and Equivalents	5%	+/- 5%	90 Day T-Bills

**Domestic Equity:** The domestic equity portion of the Portfolio will consist of common stocks and convertible preferred stocks. Stocks shall consist of high-quality, readily marketable securities of corporations that are traded on either the New York Stock Exchange, American Stock Exchange or the NASDAQ Exchange, with the requirement that such stocks have adequate market liquidity relative to the size of the investment. Equity holdings in any one security are limited to 5% or less of the total Portfolio value on a purchase cost basis, and no single major industry shall represent more than 20% of the total Portfolio value. Equities may be held individually or in the form of mutual funds or exchange-traded funds.

**International Equity:** The international equity portion of the Portfolio may consist of American Depository Receipts (ADRs) of non-US companies and foreign convertible securities. The same restrictions on domestic equity holding percentages apply to international equities.

**Fixed Income:** The fixed income portion of the Portfolio consists entirely of US denominated, US Government, US agency securities and corporate securities. No single issuer (excluding US Treasury and direct Federal Agency obligations) shall represent more than 5% of the Portfolio. No industry shall represent more than 10% of the portfolio. If purchased individually, corporate bonds must be investment grade at the time of purchase, as rated by Standard & Poor's and/or Moody's Investors Service. If an individually-purchased security drops below investment grade, the investment manager must advise the Investment Committee in writing and make recommendations. If fixed average credit rating of the bonds in the pool must be at least AA (Standard & Poor's) or Aa (Moody's).

**Alternative Investments:** Alternative Investments may include real estate investment trusts (REITS), natural resources equities and physical commodities. Equity real estate investments may be made in professionally managed, income producing commercial and residential property. Such investments may be made only through professionally managed, pooled real estate investment funds, as offered by leading real estate managers with proven track records. Natural resource equities and physical commodities investments are made through mutual funds or exchange-traded funds.

**Cash and Equivalents:** The investment managers are to invest in the highest quality commercial paper, repurchase agreements, Treasury Bills, certificates of deposit, and money market funds sponsored by nationally recognized banks, trust companies or broker dealers to provide income, liquidity, and preservation of the Portfolio's principal value. No more than 5% of the Fund's total market value is invested in the obligations of a single issuer, with the exception of the US Government and its agencies.

- F. PROFESSIONAL INVESTMENT MANAGERS:** The FFF Trustees may place Endowment/Long-Term and Short-term assets under the control and management of one or more trust companies, banks or registered investment advisors.
- G. REBALANCING:** The purpose of rebalancing is to maintain the long-term policy asset allocation within the asset allocation guidelines on a uniform basis. The Portfolio is evaluated quarterly by the Investment Committee and rebalanced at least annually. Tactical rebalancing of asset classes within their ranges is permissible to take advantage of near-term market conditions as long as the reallocations do not cause undue risk or expense to the Portfolio.
- H. ROLES AND RESPONSIBILITIES:** The Investment Committee, within the framework as set by the FFF Trustees, shall have direct responsibility for the oversight and management of the Portfolio and for the establishment of investment policies and procedures. Upon recommendation of the Investment Committee, the FFF Trustees shall have the power to employ or discharge fiscal agents or advisors. The CitF Treasurer shall be responsible to the Investment Committee for maintaining detailed records of all investment funds and for carrying out the investment policies and procedures established by the FFF Trustees and/or Investment Committee. The Investment Managers responsible for the investment of the Portfolio's assets shall report quarterly on the performance of the Portfolio, including comparative returns for each asset class and its representative index. Included will be a complete accounting of all transactions involving the Portfolio over the quarter, as well as a comprehensive statement of the Portfolio's performance during that period.
- I. ENDOWMENT EXPENDITURE POLICY:** The Endowment Expenditure Policy aims to protect the value of the endowments held by the FFF, to balance both short-term and long-term needs of the CitF, and to respect the gift intent of the donor. The maximum allowable spending rate for the FFF shall be reviewed and set no less than annually by the Board of Directors. In setting the spending rate, the Board of Directors shall take into consideration general conditions, the possible effects of inflation or deflation, the expected total return from income and the appreciation of investments, other resources of the FFF, and the investment policy of the FFF. The spending rate available for distribution to the CitF shall be set by the Board of Directors in accordance with the standards in the Uniform Prudent Management of Institutional Funds Act (as amended from time to time).
- J. TEMPORARY RESTRICTED FUNDS:** Temporary restricted funds are those with a donor- identified goal that includes eventual depletion of the fund. Those temporary restricted funds whose investment horizons are five years or more are placed in the Endowment/Long-Term Portfolio. With two exceptions, these funds are managed in a manner that is identical to endowment funds, as set forth elsewhere in this this document.  
The exceptions are:

1. There is no necessary expectation of an annual distribution to the program or cause identified by the donor.
2. In accordance with the donor's intent, withdrawals from temporary restricted funds may invade the corpus of the gift, and may reduce the fund value to zero when warranted.

**K. PROHIBITED INVESTMENTS:** The FFF's assets shall not be used for:

1. Buying and/or trading on margin or short sales or security loans.
2. Derivative instruments, options, puts and calls, warrants, foreign exchange and futures contracts. Exceptions to these may be made only when assets are invested in a mutual fund, closed-end fund or by professional money managers that periodically utilize these strategies to mitigate risk and/or to enhance return.
3. Program-related investments
4. Direct ownership of partnership instruments unless such instruments have a readily liquid market.
5. Illiquid securities or assets.

**2. SHORT-TERM INVESTMENTS**

**A. PURPOSE:** The Short-Term investment Portfolio is the repository for funds whose investment horizon is five years or less. In addition, it serves as the temporary repository for funds that are destined for the Endowment/Long-Term Portfolio as well as funds from the Endowment/Long-Term Portfolio that are about to be distributed to the CitF according to donors' wishes.

**B. ALLOWED INVESTMENTS:** The FFF Trustees may invest in the following short-term interest-bearing vehicles:

1. Insured Certificates of Deposit
2. US Treasury Bills and 1-year US Treasury Notes
3. F.D.I.C. insured interest-bearing bank accounts
4. Direct obligations of US Government Sponsored Enterprises (GSEs) backed by the full faith and credit of the US Government.
5. Corporate obligations, including corporate notes and commercial paper from corporations with AA or equivalent long-term debt ratings from at least one nationally recognized rating agency. Commercial paper investments must carry A1/P1 or equivalent short-term ratings. These assets may also be held in short-term mutual funds with an average maturity of less than two years and an average credit quality of A or equivalent.
6. Money market funds sponsored by nationally recognized banks, trust companies or broker dealers.

**C. PERFORMANCE REVIEW:** The Investment Committee will review performance of the Short-Term Portfolio on a quarterly basis, and make adjustments if necessary.

**D. PROHIBITED INVESTMENTS:** The same prohibitions on investments apply as in paragraph K., Endowments and Other Long-Term Investments.
